Facial Machine

Category: **Beauty, Wellness & Fitness** Type: **Full SOP** Priority: **High** 2 labs

Covers these lab items: Brushing Machine 10 in 1

What it is used for

A 10-in-1 facial machine combines multiple beauty functions for skin cleansing and cosmetic treatments. Use only the attachments and settings suitable for the client's skin and the manufacturer's instructions.

Main parts

- Main control unit and power switch
- Treatment handpieces and compatible attachments
- Speed or intensity controls
- Connecting cables and handpiece holders
- Treatment accessories and storage tray
- Power cord and plug

Before you start

1. Check the machine body, cables, plug, and attachments for damage.
2. Confirm the required handpiece is compatible with the machine.
3. Clean and disinfect reusable attachments according to instructions.
4. Check the client's skin condition, allergies, and treatment suitability.
5. Wash hands and prepare clean towels and required PPE.
6. Ensure the treatment area is dry, clean, and well ventilated.

How to use

1. Place the machine on a stable, dry treatment trolley.
2. Connect the required handpiece securely while the machine is switched off.
3. Connect the power plug to a suitable electrical outlet.
4. Switch on the machine and select the required function.
5. Set the intensity to the lowest suitable level before starting.
6. Test the attachment according to the manufacturer's instructions.
7. Perform the treatment using the approved technique and recommended duration.
8. Monitor the client's comfort and skin response throughout treatment.
9. Switch off the function before changing handpieces or attachments.
10. Switch off and unplug the machine after completing the treatment.
11. Clean, disinfect, dry, and store the attachments as instructed.

⚠ Safety

- Only trained beauty personnel should operate the machine.
- Do not use damaged cables, cracked attachments, or faulty controls.
- Avoid treating irritated, injured, infected, or unsuitable skin areas.
- Keep electrical connections and the control unit away from water.
- Do not use electrical, suction, or exfoliation functions beyond their intended purpose.
- Stop immediately if the client experiences pain, burning, or unusual irritation.

Care & storage

- Clean the machine exterior with an approved cleaning product.
- Disinfect compatible reusable attachments after every client.
- Keep connectors dry and inspect cables regularly.
- Store handpieces safely and arrange periodic servicing as recommended.

Common mistakes to avoid

- Using an attachment that is unsuitable for the client's skin.
- Starting with excessive intensity instead of a low setting.
- Sharing attachments without proper cleaning and disinfection.
- Changing handpieces while the machine is operating.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
