Foot Spa

Category: **Beauty, Wellness & Fitness** Type: **Full SOP** Priority: **High** 2 labs

Covers these lab items: Foot spa

What it is used for

A foot spa provides a warm-water soak for foot comfort and cosmetic care. Clean and disinfect the unit between users and check that water temperature is safe before placing feet in the basin.

Main parts

- Water basin or tub
- Temperature or heat controls, if fitted
- Water jets or massage rollers, if fitted
- Power switch and power cord
- Drain outlet or removable basin
- Splash guard and control panel

Before you start

1. Place the foot spa on a stable, level surface away from electrical hazards.
2. Inspect the basin, cord, plug, controls, and jets for damage.
3. Confirm the unit is clean and disinfected according to instructions.
4. Check the user's skin condition, allergies, and suitability for soaking.
5. Fill the basin only to the marked level with water at a safe temperature.
6. Ensure the plug and electrical connections remain dry.

How to use

1. Keep the unit switched off while filling the basin.
2. Fill with water to the indicated level and check the temperature.
3. If the unit heats water, follow its instructions and verify the temperature before use.
4. Ask the user to sit securely before placing their feet into the basin.
5. Switch on the selected massage or jet function if appropriate.
6. Keep the soak within the recommended duration and monitor comfort.
7. Stop the unit immediately if the user feels pain, burning, numbness, or discomfort.
8. Switch off the unit before removing the feet or draining water.
9. Unplug the unit before cleaning, unless the manufacturer's instructions specify otherwise.
10. Drain the basin carefully and remove visible debris.
11. Clean and disinfect all user-contact surfaces and compatible accessories.
12. Rinse if required, dry completely, and store the unit safely.

⚠ Safety

- Do not use the foot spa with damaged wiring or a cracked basin.
- Keep electrical plugs and controls dry and keep hands dry when operating switches.
- Check water temperature carefully to prevent burns.
- Avoid use on open wounds, active skin infections, or unsuitable skin conditions.
- Users with reduced foot sensation or circulation concerns should seek appropriate professional advice before use.
- Do not immerse the electrical unit or exceed the marked water level.

Care & storage

- Drain and clean the basin after every user.
- Disinfect jets and internal water-contact areas according to the manufacturer's instructions.
- Remove scale and deposits only with approved cleaning products.
- Inspect the cord, plug, basin, and controls regularly.

Common mistakes to avoid

- Using the foot spa without cleaning and disinfecting it between users.
- Filling above the marked level or using excessively hot water.
- Operating the unit with wet electrical connections or damaged wiring.
- Ignoring skin irritation, pain, or other signs of discomfort.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
