Garden Tractor

Category: **Agriculture & Gardening** Type: **Full SOP** Priority: **High** 1 labs

Covers these lab items: Garden tractor

What it is used for

To operate a garden tractor for small-scale agricultural, gardening, and landscaping tasks. To prepare the machine, use suitable attachments, and complete work safely.

Main parts

- Engine and fuel tank
- Steering wheel and controls
- Clutch, brake, and transmission
- Tyres and wheels
- PTO or attachment coupling, if fitted
- Seat and safety switches

Before you start

1. Inspect the tractor for visible damage, loose parts, and fluid leaks.
2. Check engine oil, coolant if applicable, and fuel levels.
3. Check tyre condition and pressure according to the manual.
4. Inspect brakes, steering, lights, and safety switches.
5. Confirm that the attachment is compatible and securely connected.
6. Clear people, animals, stones, and other obstacles from the work area.

How to use

1. Park on level ground and apply the parking brake.
2. Check that the transmission is in neutral and the PTO is disengaged.
3. Adjust the seat and confirm that all guards are installed.
4. Start the engine according to the manufacturer's instructions.
5. Allow the engine to warm up and check for unusual noise or warning lights.
6. Select the appropriate gear and release the parking brake when ready.
7. Move slowly and steer carefully while operating the tractor.
8. Engage an attachment only as instructed and at the specified operating speed.
9. Reduce speed before turning and avoid sudden movements.
10. Disengage the PTO and lower attachments before stopping, as applicable.
11. Park on level ground, disengage the transmission, apply the parking brake, and switch off the engine.
12. Remove the key and inspect the tractor after use.

⚠ Safety

- Only trained operators should use the tractor.
- Keep hands, feet, clothing, and people away from moving parts and PTO shafts.
- Never carry passengers unless the tractor is specifically designed for them.
- Avoid steep slopes, unstable ground, and sudden turns that could cause rollover.
- Use the required guards and rollover protection; wear a seat belt when provided and required.
- Stop the engine and remove the key before clearing blockages or servicing attachments.

Care & storage

- Clean dirt and plant debris after use.
- Check fluid levels and inspect for leaks regularly.
- Lubricate service points according to the maintenance schedule.
- Inspect tyres, belts, blades, and attachments for wear.
- Store in a dry, secure area and follow the service schedule.

Common mistakes to avoid

- Starting with the PTO engaged or transmission in gear.
- Using an incompatible or poorly secured attachment.
- Operating at excessive speed or on unsafe slopes.
- Ignoring warning lights, leaks, or unusual noises.
- Cleaning or adjusting moving parts while the engine is running.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
