Covers these lab items: Basic first aid kit; Basic first aid kits; First Aid; First Aid box; First Aid box with basic medicines; First Aid Equipment; First aid kit; First aid stations and rescue kits equipped for wilderness settings; Portable first aid stations, evacuation stretchers, and fire extinguishers

What it is used for

A first aid kit provides basic supplies for immediate care of minor injuries until further medical help is available. Use suitable items according to the injury and the instructions provided.

How to use

1. Check the kit contents, expiry dates, and packaging before use.
2. Wash hands and wear disposable gloves when available.
3. Select the appropriate dressing or first aid item for the injury.
4. Clean minor wounds using suitable clean water or approved wound-cleaning supplies.
5. Apply a sterile dressing or bandage without restricting circulation.
6. Seek professional medical help for serious injuries, severe bleeding, burns, or breathing problems.
7. Replace used items and close the kit after use.

⚠ Safety

- Do not give medicines unless authorised and appropriate for the person.
- Do not use expired, damaged, or contaminated supplies.
- Call emergency services for life-threatening injuries and follow trained first aid procedures.
- Avoid direct contact with blood or other body fluids.

Care & storage

- Store the kit in a clean, dry, clearly marked, accessible location.
- Inspect supplies regularly and replace used or expired items.
