Battery

Category: **Solar, Power & Energy** Type: **Short SOP** Priority: **High** 8 labs

Covers these lab items: Batteries for total station; Battery; Coin Cell; Spare Batteries and Bulbs

What it is used for

Batteries supply electrical energy to instruments, devices, and equipment. Identify the correct battery type, voltage, and polarity before installation or replacement.

How to use

1. Check the battery label, type, voltage, and required polarity for the device.
2. Inspect the battery for leakage, swelling, corrosion, or physical damage.
3. Switch off the device before replacing a removable battery.
4. Install the battery according to the positive and negative markings.
5. Use the approved charger only for rechargeable batteries.
6. Switch on the device and confirm normal operation or battery status.
7. Remove depleted batteries when appropriate and send them to an approved collection point.

⚠ Safety

- Never short-circuit battery terminals or connect them with metal objects.
- Do not recharge non-rechargeable batteries or use incompatible chargers.
- Do not open, crush, puncture, or burn batteries.
- Handle leaking or damaged batteries according to safety guidance and avoid skin contact.

Care & storage

- Store batteries in a cool, dry place away from metal objects and direct heat.
- Separate used batteries for approved recycling and replace them with the specified type.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
