Foot Sprayer

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **High** 5 labs

Covers these lab items: Foot / Hand sprayers; Foot Sprayer

What it is used for

A foot sprayer uses foot-operated pumping to deliver water or an approved spray solution. Operate it on stable ground and use only the liquid specified for the task.

How to use

1. Inspect the tank, foot pump, hose, nozzle, seals, and straps for damage or leaks.
2. Prepare the approved spray solution according to its label and required dilution.
3. Fill the tank without exceeding its marked capacity and close the cap securely.
4. Fit the sprayer correctly and check that the hose and nozzle are connected firmly.
5. Operate the foot pump as instructed to build pressure.
6. Direct the nozzle away from people and apply the spray evenly to the target area.
7. Release pressure safely before opening or cleaning the tank.
8. Empty, rinse, and clean the sprayer according to the product instructions.

⚠ Safety

- Wear the PPE specified for the spray solution, including gloves and eye protection where required.
- Avoid inhaling spray mist and do not spray against the wind.
- Never point the nozzle at people or animals.
- Do not open the tank while it is pressurised.

Care & storage

- Clean the tank, hose, and nozzle after use to prevent residue and blockages.
- Store the sprayer in a dry, secure location away from children and direct sunlight.
