Glue Gun

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **High** 5 labs

Covers these lab items: Glue Gun; Glue Gun/Adhesive Tools; Hot glue gun

What it is used for

A glue gun heats a compatible adhesive stick and dispenses molten glue for crafts, repairs, and assembly work. Use the correct glue type and allow the adhesive to cool before handling the bonded item.

How to use

1. Inspect the glue gun, power cord, trigger, stand, and nozzle for damage.
2. Insert a compatible glue stick into the feed opening.
3. Place the glue gun upright on its heat-resistant stand.
4. Connect the gun to the approved power supply and allow it to heat as instructed.
5. Test a small amount of glue on scrap material before applying it to the workpiece.
6. Apply glue carefully using the trigger and keep fingers away from molten adhesive.
7. Release the trigger, return the gun to its stand, and allow the bond to cool.
8. Disconnect the gun after use and let it cool completely before storage.

⚠ Safety

- Never touch the hot nozzle or molten glue, which can cause burns.
- Keep the gun away from water and flammable materials.
- Do not leave a powered glue gun unattended.
- Use suitable ventilation and keep the nozzle away from skin and eyes.

Care & storage

- Wipe cooled external residue only as directed and never pull hot glue by hand.
- Store the fully cooled gun in a dry place with its cord undamaged.
