CPR Pocket Mask

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **High** 3 labs

Covers these lab items: Pocket Mask

What it is used for

A CPR pocket mask provides a barrier for rescue breaths during CPR and helps reduce direct contact with the casualty. Use it according to current first aid training and the manufacturer's instructions.

How to use

1. Check the mask, one-way valve, and case for damage or contamination.
2. Call emergency services and assess the scene before approaching the casualty.
3. Wear gloves and other available protective equipment.
4. Place the casualty on their back and open the airway using the trained technique.
5. Position the mask securely over the nose and mouth, following its instructions.
6. Provide rescue breaths as trained and watch for visible chest rise.
7. Continue CPR according to current training and emergency dispatcher guidance.
8. Dispose of single-use parts correctly or clean reusable components as instructed.

⚠ Safety

- Do not delay CPR or emergency assistance while searching for a mask.
- Do not use a damaged or contaminated mask.
- Follow infection-control precautions and avoid direct contact with body fluids.
- Use the mask only within your training and follow emergency dispatcher instructions.

Care & storage

- Store the mask in its clean, closed case and check expiry or condition regularly.
- Replace single-use masks and maintain reusable components according to the manufacturer.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
