Gas Lighter

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **High** 2 labs

Covers these lab items: Gas lighter

What it is used for

A gas lighter produces a spark or flame to ignite a compatible gas appliance. Use it only according to its design and the appliance manufacturer's instructions.

How to use

1. Inspect the lighter for cracks, gas leakage, damage, or loose parts.
2. Check that the appliance is correctly connected and its controls are in the required position.
3. Keep your face, hands, and clothing away from the ignition point.
4. Operate the lighter according to its instructions at the designated ignition point.
5. Confirm that the appliance flame lights correctly and remains stable.
6. If ignition fails, turn off the gas supply and follow the appliance's relighting procedure after the required waiting period.
7. Switch off the gas supply after use and store the lighter safely.

⚠ Safety

- Never use a leaking or damaged lighter.
- Keep the lighter away from children, flammable materials, and hot surfaces.
- Do not search for gas leaks using a flame.
- If you smell gas, do not ignite anything or operate electrical switches; leave the area and follow emergency guidance.

Care & storage

- Keep the lighter clean and dry and store it away from heat.
- Replace or service it if ignition becomes unreliable or damage is found.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
