Chemical Reagent

Category: **Consumables & Raw Materials** Type: **Handling note** Priority: **High** 23 labs

Covers these lab items: Buffer; Chemical reagents; Chemicals; CMT reagent; CMT reagent (for detection of mastitis); Crystals; Diluting fluids; Formalin; Hydrogen Peroxide Bottle; Liquid; Sodium benzoate; Sodium hydroxide pellets; Staining solution / reagents / Gram stain / AFB stain / KOH stain; Staining solution / reagent

What it is used for

Chemical reagents are used for laboratory testing, preparation, cleaning, and analysis according to their specific properties.

How to handle

- Read the label and Safety Data Sheet before use; wear appropriate PPE.
- Use correct measuring tools and never mix chemicals unless the procedure specifically requires it.
- Handle corrosive, toxic, volatile, and reactive chemicals in suitable ventilation with appropriate precautions.

Storage

- Keep in compatible, clearly labelled, tightly closed containers, separated by chemical compatibility.
- Follow the specified temperature, light protection, and restricted-access requirements.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
