Refrigerant Gas

Category: **Consumables & Raw Materials** Type: **Handling note** Priority: **High** 1 labs

Covers these lab items: Refrigerant

What it is used for

Refrigerant gases transfer heat in compatible refrigeration and air-conditioning systems and require pressure and exposure controls.

How to handle

- Identify the refrigerant and check equipment compatibility before connecting cylinders or service hoses.
- Use trained personnel, specified PPE, and equipment rated for the refrigerant pressure and type.
- Provide ventilation, avoid direct contact with escaping gas or liquid, and prevent oxygen displacement.
- Recover refrigerant with approved equipment; never intentionally vent it where prohibited.

Storage

- Secure cylinders upright with protective caps where applicable in a cool, ventilated area.
- Keep away from heat and use only approved cylinders for the specific refrigerant.
