Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 83 labs

Covers these lab items: A/V Equipment (for presentations); LCD Projector; LCD Projector and Laptop for presentations; LCD projector and projection screen; LCD projector, projection screen, and audio system; Multimedia Projector; Multimedia projector and projector screen; Overhead/ Multimedia projector and Projector Screen;

What it is used for

A projector displays computer or media content on a screen for teaching, meetings, and presentations. Set it up with compatible connections and allow adequate ventilation during operation.

How to use

1. Inspect the projector, power cable, lens, remote control, and connection ports.
2. Place the projector on a stable surface or secure mounting bracket with clear ventilation.
3. Connect the computer or media source using a compatible cable.
4. Switch on the source device and projector, then select the correct input.
5. Adjust focus, image size, and alignment to fit the screen.
6. Check image clarity, brightness, sound, and presentation content before starting.
7. Use the normal shutdown procedure and allow the cooling cycle to finish.
8. Disconnect cables if required and store the projector after it cools.

⚠ Safety

- Never block ventilation openings or touch a hot projector lamp.
- Do not look directly into the projector lens while it is operating.
- Keep liquids away from the projector and its power connections.
- Disconnect power before cleaning or connecting equipment when instructed by the manufacturer.

Care & storage

- Clean the lens and air filter according to the manufacturer's instructions.
- Keep vents clear and store the projector in a dry, protected location.
