What it is used for

Pliers grip, bend, twist, or cut suitable materials depending on their design. Select the correct type and size for the task and inspect the tool before use.

How to use

1. Inspect the jaws, pivot, handles, and insulation for wear or damage.
2. Select pliers suited to the material and task, such as gripping or cutting.
3. Hold the handles firmly and position the jaws securely on the workpiece.
4. Apply controlled force without twisting the tool beyond its intended use.
5. Keep the workpiece secured and direct cutting ends away from the body.
6. Release the handles carefully and check the workpiece after adjustment.
7. Clean the pliers and return them to the designated storage location.

⚠ Safety

- Never use ordinary pliers on live electrical conductors.
- Use insulated pliers for electrical work only when correctly rated and inspected.
- Keep fingers away from cutting edges and pinch points.
- Do not use pliers as a hammer or apply excessive force.

Care & storage

- Wipe the jaws clean and lightly protect pivot points against corrosion when appropriate.
- Store pliers dry and replace tools with damaged jaws or handles.
