Covers these lab items: Personal Protection Equipment; Personal Protection Equipment Kit; Personal Protective Equipment; Personal Protective Equipment Kit (PPE); Personal Protective Equipment (PPE); Personal protective equipment (PPE) like gloves, face masks, and hand sanitizers; Personal protective equipment (PPE) like gl

What it is used for

A personal protective equipment kit contains items selected to reduce exposure to workplace hazards. Choose the correct PPE for the task and inspect each item before use.

How to use

1. Identify the task hazards and check the required PPE list or risk assessment.
2. Inspect the kit and each item for damage, contamination, or expiry.
3. Select PPE that fits correctly and matches the identified hazards.
4. Put on the equipment in the recommended order and adjust it securely.
5. Check that protective items do not interfere with each other or safe movement.
6. Perform the task while following the workplace safety procedure.
7. Remove PPE carefully to avoid transferring contamination and clean or dispose of items as required.
8. Return reusable equipment to its designated storage location.

⚠ Safety

- Do not use damaged, expired, or unsuitable protective equipment.
- PPE does not replace hazard controls, safe work procedures, or required training.
- Use respirators and other specialised PPE only with appropriate training and fit checks.
- Report missing equipment or any defect before starting hazardous work.

Care & storage

- Clean reusable PPE according to the manufacturer's instructions and store it dry.
- Replace disposable items after use and inspect reusable equipment regularly.
