# Hoe

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 36 labs

**Covers these lab items:** Dutch Hand Hoe; Dutch-hoe; Garden hoe; Garden Hoes; Hand hoe (Khurpi); Hoe; Hoe-cum-rack; Khurpi; Long Handle Hoes; Pronged hoes; Straight Blade Hand Hoe; Trenching hoe

## What it is used for

A hoe is used to loosen soil, remove weeds, shape planting beds, and perform light garden cultivation. Choose the appropriate hoe type and work with controlled movements in a clear area.

## How to use

1. Inspect the blade, head, handle, and attachment for cracks or looseness.
2. Select a hoe suitable for the soil and intended task.
3. Clear the work area of stones, cables, and other obstructions.
4. Hold the handle firmly with both hands and maintain stable footing.
5. Use controlled strokes directed away from the body and nearby people.
6. Avoid striking buried pipes, irrigation lines, or plant roots unnecessarily.
7. Remove soil and debris from the blade after work.
8. Store the hoe safely with the blade protected.

## ⚠ Safety

- Wear sturdy footwear, gloves, and eye protection when required.
- Keep other people clear of the swinging range.
- Do not use a hoe with a loose head or damaged handle.
- Carry the hoe with the blade pointed down and away from the body.

## Care & storage

- Clean and dry the blade after use to reduce rust.
- Store the hoe in a dry location and sharpen or repair it as required.
