Covers these lab items: Button hole scissor; Cutting Scissors; Embroidery scissors; Embroidery Snips; Fabric Scissors; Paper Scissors; Scissor; Scissors; Scissors (plastic handled scissor for cutting paper), Pinking Shears; Scissors (sharp, medium size); Small Scissors

What it is used for

Scissors cut paper, fabric, thread, and other materials suited to their design. Select the correct scissors for the material and use them with controlled movements.

How to use

1. Inspect the blades, pivot, handles, and tips for damage or looseness.
2. Choose scissors designed for the material, such as fabric, paper, or embroidery work.
3. Hold the handles correctly and keep the material stable on the work surface.
4. Align the blades with the intended cutting line and cut using smooth strokes.
5. Keep fingers clear of the blades and avoid forcing thick material through unsuitable scissors.
6. Close the blades when carrying or setting the scissors down.
7. Clean the blades and store the scissors safely after use.

⚠ Safety

- Never run or move quickly while carrying open scissors.
- Cut away from the body and keep other people clear of the cutting area.
- Do not use damaged scissors or use them as a prying tool.
- Pass scissors to another person closed and handle-first.

Care & storage

- Wipe blades clean and dry after use, especially after cutting damp materials.
- Store scissors closed and arrange sharpening or replacement when cutting performance declines.
