Projection Screen

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 30 labs

Covers these lab items: Projection Screen; Projector Screen

What it is used for

A projection screen provides a suitable surface for displaying images and presentations from a projector. Position and maintain the screen to support clear viewing and safe use.

How to use

1. Inspect the screen surface, frame, stand, and mounting points for damage.
2. Place or mount the screen securely with adequate clearance around it.
3. Position the screen to face the audience and align it with the projector.
4. Extend or lower the screen using its approved mechanism without forcing it.
5. Check image alignment, visibility, and screen stability before the presentation.
6. Keep the screen surface free from obstructions during use.
7. Retract or fold the screen carefully after the presentation.
8. Secure the screen and store it safely if it is portable.

⚠ Safety

- Secure wall mounts and stands to prevent tipping or falling.
- Keep fingers clear of retracting mechanisms and moving supports.
- Do not hang objects from the screen or its frame.
- Keep the screen away from heat, moisture, and walkways.

Care & storage

- Clean the screen using materials approved by the manufacturer.
- Retract or cover the screen when not in use to protect it from dust and damage.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
