CCTV Camera

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 28 labs

Covers these lab items: Cameras / CCTV; CCTV Cameras; Different types of CCTV cameras; Dome Camera; Pan Tilt and Zoom (PTZ) Camera; Security cameras

What it is used for

A CCTV camera captures video for security, monitoring, or observation through a connected recording system. Use the camera according to site privacy rules and the approved installation plan.

How to use

1. Inspect the camera housing, lens, cable, mount, and connectors for damage.
2. Confirm the camera location is authorised and appropriate for the monitoring purpose.
3. Mount the camera securely and adjust its direction to cover the intended area.
4. Connect power and network or video cables according to the system design.
5. Configure the camera using authorised settings and secure access credentials.
6. Check the live view, image clarity, date, time, and recording status.
7. Verify that the camera covers the intended area without unnecessary obstruction.
8. Report faults and safely disconnect power before authorised maintenance.

⚠ Safety

- Respect privacy laws and do not monitor private areas without proper authorisation.
- Use suitable mounting and fall protection when working at height.
- Do not open powered equipment or touch exposed electrical connections.
- Protect passwords and restrict access to authorised personnel.

Care & storage

- Clean the lens and housing using suitable materials without scratching the lens.
- Inspect mounts, cables, image quality, and recording operation regularly.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
