# Air Purifier

Category: **Hospitality & Housekeeping** Type: **Short SOP** Priority: **Medium** 22 labs

**Covers these lab items:** Air Purifier; Air purifiers

## What it is used for

An air purifier filters airborne particles and, depending on its design, certain odours or gases from indoor air. Operate it in a suitable location and maintain its filters according to the manufacturer's instructions.

## How to use

1. Inspect the purifier, power cord, air inlet, outlet, and housing for damage.
2. Place the unit on a stable surface with clear space around the air inlet and outlet.
3. Check that the filter is correctly installed and protective packaging has been removed.
4. Connect the unit to an approved power supply and switch it on.
5. Select the required fan speed or operating mode for the room.
6. Keep doors, windows, and nearby obstructions in line with the intended use instructions.
7. Check indicator lights and replace filters when the unit signals or the schedule requires.
8. Switch off and unplug the purifier before cleaning or filter replacement.

## ⚠ Safety

- Do not operate the purifier with damaged cables or a wet housing.
- Never block air inlets or outlets.
- Keep the unit away from water and excessive heat.
- Use only filters approved for the model and follow replacement instructions.

## Care & storage

- Clean the exterior and reusable pre-filter according to the manual.
- Replace filters as recommended and keep the unit dry and dust-free.
