Ruler

Category: **Measuring & Marking Tools** Type: **Short SOP** Priority: **Medium** 22 labs

Covers these lab items: Adhesive- Backed Rulers; Clear Ruler; Meter Stick/Yardstick; Ruler; Ruler or Scale; Rulers; Scale; Steel rule; Steel Ruler; Steel scale; Yardstick/Meter-stick

What it is used for

A ruler measures length and helps draw straight lines or mark dimensions on materials. Select the correct ruler type and use its scale carefully for accurate measurements.

How to use

1. Inspect the ruler, scale markings, and edges for damage or wear.
2. Choose a ruler with suitable length and units for the task.
3. Place the ruler flat against the workpiece and align its zero mark with the starting point.
4. Hold the ruler steady and mark or read the required measurement.
5. Read the scale at eye level to reduce reading errors.
6. Record the measurement with the correct units.
7. Clean the ruler and return it to its storage location.

⚠ Safety

- Keep sharp steel edges away from fingers and skin.
- Do not use a damaged ruler with sharp burrs or broken edges.
- Keep the ruler clear of moving machinery and live electrical equipment.

Care & storage

- Wipe the ruler clean and dry after use.
- Store it flat and protect its markings from abrasion or corrosion.
