Display Screen

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 21 labs

Covers these lab items: Digital screens displaying travel packages; LCD screens; Liquid Crystal Display screens

What it is used for

A display screen presents digital information, images, videos, or presentations for viewing. Use the correct input source and display settings to ensure clear content and reliable operation.

How to use

1. Inspect the screen, stand or mount, power cable, and connectors for damage.
2. Place or mount the screen securely with adequate ventilation.
3. Connect the approved computer, media player, or signal source.
4. Switch on the screen and select the correct input source.
5. Adjust brightness, contrast, resolution, and orientation as needed.
6. Check that text and images are clear and fully visible.
7. Switch off the screen after use and disconnect cables if required.
8. Keep the display area clear and secure the equipment after use.

⚠ Safety

- Do not operate the screen with damaged cables or a cracked panel.
- Keep liquids away from the screen and electrical connections.
- Secure wall mounts and stands to prevent falling or tipping.
- Do not block ventilation openings or open the screen casing while powered.

Care & storage

- Clean the screen with a soft cloth and manufacturer-approved cleaner.
- Keep vents clear and protect the display from impact and excessive heat.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
