Sieve

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **Medium** 21 labs

Covers these lab items: Colanders & Strainers; Flour sifter/ sieves; Hand rotary sieve; Hand Screens/Sieves; Hand sieves; Sand Sieve; Sieve Set; Sieves); Stainer (strainer for adhesives); Strainer; Tea Strainer

What it is used for

A sieve separates materials by particle size or removes solid pieces from liquids. Select a suitable mesh size and clean the sieve before and after processing.

How to use

1. Inspect the mesh, frame, handle, and joints for damage or blockage.
2. Choose a sieve with suitable mesh size for the material.
3. Place the sieve securely over a clean collection container.
4. Add a manageable quantity of material and spread it evenly across the mesh.
5. Shake or rotate the sieve gently as appropriate for its design.
6. Collect the material passing through and the retained fraction separately if required.
7. Dispose of unwanted residue and clean the sieve after use.
8. Dry the sieve fully and store it in a clean location.

⚠ Safety

- Wear suitable gloves and eye protection when handling dusty or hazardous materials.
- Avoid creating dust clouds while sifting powders.
- Do not use a sieve with torn mesh or loose parts.
- Use food-grade, clean sieves for food preparation.

Care & storage

- Brush or rinse the mesh using a method suitable for the material.
- Dry thoroughly and store without bending or damaging the mesh.
