Trowel

Category: **Construction & Masonry** Type: **Short SOP** Priority: **Medium** 21 labs

Covers these lab items: Big Trowel; Small Trowel; Trowel; Trowel (Thapi- Plane); Trowel (Thapi) Set; Trowels

What it is used for

A trowel spreads, smooths, or applies materials such as mortar, plaster, and soil. Choose a suitable trowel and keep the work area organised during use.

How to use

1. Inspect the blade, handle, and joint for cracks, bending, or looseness.
2. Select a trowel suitable for the material and finishing task.
3. Prepare the work surface and mix the material according to the approved procedure.
4. Hold the handle firmly and collect a manageable amount of material on the blade.
5. Spread or shape the material with smooth, controlled strokes.
6. Avoid excessive pressure that may damage the surface or tool.
7. Remove material residue from the blade after finishing.
8. Clean, dry, and store the trowel safely.

⚠ Safety

- Wear gloves and eye protection when handling cement, plaster, or irritating materials.
- Keep hands away from sharp blade edges.
- Do not use a trowel with a loose handle or damaged blade.
- Keep the work area clear to prevent slips and trips.

Care & storage

- Clean the blade before mortar or plaster hardens.
- Dry the trowel and store it in a dry place to reduce corrosion.
