Scanner

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 20 labs

Covers these lab items: Digital document scanners, printers, and secure data management systems; Scanner; Scanner and Printer; Scanners

What it is used for

A scanner converts paper documents, photographs, or other suitable media into digital files. Use the correct scan settings and approved storage location to maintain image quality and data security.

How to use

1. Inspect the scanner glass, feeder, lid, cable, and controls for damage.
2. Switch on the scanner and connect it to the authorised computer or network.
3. Clean the scanning glass and remove dust or loose objects from the feeder.
4. Place the document correctly on the glass or in the approved feeder.
5. Select the required file format, resolution, colour mode, and destination folder.
6. Preview the scan and adjust alignment or cropping if needed.
7. Start scanning and check the resulting file for clarity and completeness.
8. Save the file using an appropriate name and approved storage location.
9. Remove documents and switch off the scanner when finished.

⚠ Safety

- Keep liquids away from the scanner and electrical connections.
- Do not place hands near moving feeder rollers while scanning.
- Scan and store confidential documents only with proper authorisation.
- Disconnect power before cleaning internal areas as instructed.

Care & storage

- Clean the glass and feeder rollers using approved materials.
- Keep the scanner covered when not in use and report recurring feed errors.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
