Category: **Hand Tools - Fastening & Gripping** Type: **Short SOP** Priority: **Medium** 20 labs

Covers these lab items: Hand tools; Hand tools kits; Machine tool kit (screw driver, screw etc.); Machine toolkit; Other tools; Tool kit; Tool kit like hand tools; Tool Kit (Spanners, Screwdrivers, Pliers); Tool kits; Tools and equipment

What it is used for

A tool kit keeps hand tools and accessories organised for maintenance, assembly, and repair tasks. Select the correct tool for each job and return equipment to the kit after use.

How to use

1. Open the kit and check the inventory for missing or damaged tools.
2. Select the correct tool size and type for the task.
3. Inspect the selected tool for cracks, wear, or loose parts.
4. Secure the workpiece and use the tool according to its intended function.
5. Apply controlled force and avoid using tools for unintended purposes.
6. Clean tools after use and check for damage before returning them.
7. Return each tool to its designated compartment and close the kit.

⚠ Safety

- Use suitable PPE for the task and material being handled.
- Do not use damaged tools or tools with loose handles.
- Keep sharp tools covered and avoid leaving tools on walkways.
- Use insulated tools for electrical tasks only when correctly rated and inspected.

Care & storage

- Keep the kit clean, dry, and organised after every use.
- Replace missing or damaged tools and store the kit in a secure location.
