Speaker

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 18 labs

Covers these lab items: Bluetooth Speaker; Computer system; Laptop External Speakers; Portable speakers and microphones; Portable speakers for voice clarity during role-play or video demonstrations; Speaker; Speakers

What it is used for

A speaker converts audio signals into sound for presentations, training, communication, or entertainment. Connect it to a compatible source and set a suitable volume for the room.

How to use

1. Inspect the speaker, power cable, battery, ports, and controls for damage.
2. Place the speaker on a stable surface with ventilation and clear sound output.
3. Connect it to the compatible audio source using the approved cable or pairing method.
4. Switch on the speaker and select the correct input or Bluetooth mode.
5. Start audio at a low volume and gradually adjust to a clear listening level.
6. Check sound quality and microphone feedback if a microphone is connected.
7. Lower the volume and switch off the speaker after use.
8. Disconnect cables and store the speaker safely.

⚠ Safety

- Avoid excessive volume that may damage hearing.
- Keep liquids away from electrical speakers and charging ports.
- Do not use damaged batteries or power adapters.
- Keep cables arranged to prevent trips and accidental pulling.

Care & storage

- Clean the speaker exterior with a soft, dry cloth.
- Charge batteries with the approved adapter and store the unit in a dry place.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
