Safety Helmet

Category: **Safety & PPE** Type: **Short SOP** Priority: **Medium** 17 labs

Covers these lab items: Head protection; Helmets/hard hats; Safety helmet; Safety helmets

What it is used for

A safety helmet protects the head from specified workplace hazards such as falling objects or impact. Select a helmet suited to the hazard and ensure it is correctly fitted before entering the work area.

How to use

1. Inspect the shell, suspension, chin strap, and adjustment mechanism for cracks or damage.
2. Confirm the helmet type and rating are suitable for the worksite hazards.
3. Adjust the suspension and headband to obtain a secure, comfortable fit.
4. Fasten the chin strap when required by the task or site rules.
5. Check that the helmet sits correctly and does not obstruct vision.
6. Wear the helmet in designated areas and replace it after a significant impact as required.
7. Clean and store the helmet according to the manufacturer's instructions.

⚠ Safety

- Do not use a cracked, modified, expired, or impact-damaged helmet.
- Do not drill holes, paint, or attach unapproved accessories to the helmet.
- Keep the helmet away from chemicals, excessive heat, and direct sunlight during storage.
- A helmet does not replace other required PPE or safe work practices.

Care & storage

- Clean the shell and suspension with approved materials and inspect them regularly.
- Store the helmet in a clean, dry location away from impact and heat.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
