Pruning Secateurs

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 16 labs

Covers these lab items: Pruners; Pruning Sheared / C Cutter; Pruning Shears; Secateur; Secateurs; Tree Cutting Shears

What it is used for

Pruning secateurs cut small stems, twigs, and plant growth during gardening and plant maintenance. Select a suitable tool and make controlled cuts to avoid damaging the plant or injuring the user.

How to use

1. Inspect the blades, pivot, spring, handle, and locking catch for damage.
2. Select secateurs suitable for the branch thickness and plant type.
3. Wear suitable gloves and secure the plant or branch where needed.
4. Open the blades and position the branch correctly between the cutting edges.
5. Make a controlled cut without twisting the tool or exceeding its capacity.
6. Lock the secateurs closed immediately after use.
7. Remove plant residue and clean the blades before storage.
8. Store the secateurs with the blades closed in a safe, dry location.

⚠ Safety

- Keep fingers away from the cutting edges and pinch points.
- Do not cut branches thicker than the tool's rated capacity.
- Never leave open secateurs unattended or within children's reach.
- Use eye protection when cutting branches that may spring back.

Care & storage

- Clean and dry the blades after use to reduce corrosion and sap buildup.
- Lubricate the pivot and sharpen or replace blades according to the manufacturer's instructions.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
