Crimping Tool

Category: **Hand Tools - Fastening & Gripping** Type: **Short SOP** Priority: **Medium** 14 labs

Covers these lab items: Crimpers; Crimping Tool; Crimping tools; Hand crimping tools; Stripping & Crimping Tools (1 set); Wire Crimpers; Wire Simpers

What it is used for

Use a crimping tool to secure a suitable terminal or connector onto a wire for a reliable electrical or mechanical connection.

How to use

1. Select a crimping tool and terminal that match the wire size and connector type.
2. Inspect the tool jaws and handles for damage or excessive wear.
3. Strip the required length of insulation without cutting the wire strands.
4. Insert the wire fully into the correct terminal barrel.
5. Place the terminal in the matching crimping die and position it correctly.
6. Squeeze the handles fully as instructed by the tool manufacturer.
7. Inspect the crimp and gently pull the wire to check that it is secure.

⚠ Safety

- Keep fingers clear of the crimping jaws and moving handles.
- Use the correct die and terminal for the wire size.
- Do not crimp live electrical wires; isolate power first.
- Wear eye protection when wire strands or cut ends may spring free.

Care & storage

- Wipe the tool clean and store it in a dry place.
- Check jaws and pivots regularly for wear or damage.
