Baking Mould

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **Medium** 13 labs

Covers these lab items: Aluminium Cake pan; Baking Trays & Molds; Baking Trays, Moulds, Pans; Bread tin/ mould; Cake rings; Moulds/cutter; Muffin tray; One-piece and two-piece molds

What it is used for

Use a baking mould to shape batter or dough during baking while maintaining the required portion and product form.

How to use

1. Select a mould suitable for the recipe, oven, and required product size.
2. Inspect the mould for cracks, sharp edges, rust, or damaged coating.
3. Clean and dry the mould before use.
4. Apply suitable grease or lining if required by the recipe.
5. Fill the mould evenly without exceeding its recommended capacity.
6. Place the mould securely on an oven tray or rack using oven-safe protection.
7. Bake at the recipe's specified temperature and time.
8. Allow the mould to cool safely before removing the baked product.

⚠ Safety

- Use oven mitts when handling hot moulds and trays.
- Do not place moulds in an oven unless their material is oven-safe.
- Avoid sudden temperature changes that may warp or crack the mould.
- Follow food hygiene practices and avoid damaged non-stick coatings.

Care & storage

- Wash using a suitable cleaner and non-abrasive tools.
- Dry thoroughly and store without stacking in a way that damages the coating.
