Budding and Grafting Knife

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 13 labs

Covers these lab items: Budding and grafting knife; Budding Knife; Grafting knife; Mixed budding and grafting knife

What it is used for

Use a budding and grafting knife to make controlled cuts when preparing plant buds, scions, or rootstocks for propagation.

How to use

1. Select a clean, sharp knife suitable for the plant and grafting method.
2. Inspect the blade, handle, and locking mechanism if fitted.
3. Wear suitable gloves and secure the plant material before cutting.
4. Make precise cuts using the method appropriate to the selected plant.
5. Keep cut surfaces clean and join the bud or scion promptly as required.
6. Secure the graft with suitable grafting tape or material.
7. Clean and disinfect the blade after use according to plant health guidance.

⚠ Safety

- Cut away from your body and supporting hand.
- Keep the blade covered when not in use.
- Do not use a loose, damaged, or blunt knife.
- Handle disinfectants according to their label instructions.

Care & storage

- Clean, dry, and protect the blade after use.
- Store the knife closed or in a protective sheath away from children.
