Scraper

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 13 labs

Covers these lab items: Carbon scrapers; Gasket scrapers; Round Scrapping Knife; Scrapers; Scrappers; Scrapping Knife; Trim or moulding tools

What it is used for

Use a scraper to remove residue, old gasket material, paint, or deposits from a surface without damaging the underlying material.

How to use

1. Select a scraper with a blade and shape suitable for the surface.
2. Inspect the handle and blade for looseness, cracks, or damage.
3. Secure the workpiece and remove nearby obstructions.
4. Hold the scraper firmly and use controlled strokes at a suitable angle.
5. Work away from your body and avoid gouging the surface.
6. Collect removed residue and check the surface after scraping.
7. Clean the scraper and replace or protect the blade as needed.

⚠ Safety

- Wear safety glasses and suitable gloves when required.
- Keep hands away from the blade edge and cutting path.
- Do not use excessive force or a damaged scraper.
- Confirm the surface can tolerate scraping before starting.

Care & storage

- Remove residue and dry the tool after use.
- Store sharp blades with a protective cover.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
