Chisel

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 12 labs

Covers these lab items: Chisel; Chisel and Hammer; Chisel set; Firmer Chisel; Mortise / Chisel /; Pairing Chisel)

What it is used for

Use a chisel with a suitable hammer or hand pressure to cut, shape, or remove material during workshop tasks.

How to use

1. Select a chisel type and size suitable for the material and task.
2. Inspect the cutting edge, shaft, and striking head for damage or mushrooming.
3. Secure the workpiece firmly on a stable support.
4. Wear eye protection and position the chisel at the required angle.
5. Strike the chisel with a suitable hammer using controlled force, where applicable.
6. Remove material in small cuts and check the result regularly.
7. Clean the chisel and protect its cutting edge after use.

⚠ Safety

- Wear safety glasses and keep bystanders clear of flying chips.
- Do not use a chisel with a cracked shaft or mushroomed head.
- Keep the supporting hand away from the cutting path.
- Use the correct chisel for the material and task.

Care & storage

- Keep the cutting edge sharp and free from rust.
- Store chisels with cutting edges covered or separated.
