Ladder

Category: **Retail, Logistics & Warehouse** Type: **Short SOP** Priority: **Medium** 12 labs

Covers these lab items: Ladder; Ladder to climb Dhroni; Ladders and Step Stools

What it is used for

Use a ladder to reach elevated work areas safely when a suitable ladder is appropriate for the task.

How to use

1. Choose a ladder with the correct height, load rating, and type for the task.
2. Inspect the rails, rungs, feet, locks, and hinges for damage.
3. Place the ladder on a firm, level, non-slip surface.
4. Fully open and lock a step ladder, or secure an extension ladder at the correct angle.
5. Maintain three points of contact while climbing and keep your body centered between the rails.
6. Carry tools in a suitable belt or raise them separately rather than climbing with full hands.
7. Descend carefully and store the ladder after use.

⚠ Safety

- Do not use a damaged ladder or place it on boxes or unstable surfaces.
- Keep ladders away from overhead electrical wires and live equipment.
- Do not overreach; climb down and reposition the ladder instead.
- Follow the ladder's load rating and avoid climbing in unsafe weather or conditions.

Care & storage

- Clean the ladder and inspect it after use.
- Store it securely in a dry area where it cannot fall.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
