Adjustable Wrench

Category: **Hand Tools - Fastening & Gripping** Type: **Short SOP** Priority: **Medium** 10 labs

Covers these lab items: Adjustable wrench; Adjustable Wrench (Adjustabl e Spanner); Slide wrench

What it is used for

Use an adjustable wrench to tighten or loosen compatible nuts and bolts by setting its jaws to the correct size.

How to use

1. Inspect the jaws, adjustment screw, and handle for damage or excessive wear.
2. Turn the adjustment screw until the jaws fit the fastener closely.
3. Place the wrench fully onto the nut or bolt head.
4. Position the movable jaw on the side that receives the main load where possible.
5. Pull the handle steadily in the correct direction without jerking.
6. Reposition the wrench if the fastener cannot be turned safely.
7. Clean and return the wrench to storage after use.

⚠ Safety

- Use the correct wrench size and ensure the jaws fit tightly.
- Do not use extension pipes or strike the wrench with a hammer.
- Keep hands clear of pinch points and slipping surfaces.
- Do not use a damaged wrench or use it on live electrical equipment.

Care & storage

- Wipe the wrench clean and keep the adjustment screw moving freely.
- Store it dry and inspect the jaws before use.
