Magnifying Glass

Category: **Laboratory Instruments & Glassware** Type: **Short SOP** Priority: **Medium**

10 labs

Covers these lab items: Magnifying Glass; Magnifying glass (magnification 10X); Magnifying lens(bi- concave lens)

What it is used for

Use a magnifying glass to enlarge small details for visual inspection, reading, or simple laboratory and craft tasks.

How to use

1. Check the lens and handle for cracks, scratches, or looseness.
2. Hold the object steady in a well-lit area.
3. Position the magnifying glass between your eyes and the object.
4. Adjust the distance until the details appear clear and focused.
5. Move the lens or object slowly to inspect different areas.
6. Put the magnifying glass away after use and avoid touching the lens surface.

⚠ Safety

- Never focus sunlight through the lens onto skin, eyes, or flammable materials.
- Do not use a damaged lens with sharp edges.
- Avoid looking directly at intense light sources through the lens.
- Keep the glass away from children when unsupervised.

Care & storage

- Clean the lens with a soft lens cloth and suitable cleaner.
- Store it in a protective case away from heat and scratches.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
