Category: **Hand Tools - Striking & Digging** Type: **Short SOP** Priority: **Medium** 10 labs

**Covers these lab items:** Mallet Plastic; Mallet Wooden; PVC mallet; Wooden hammer; Wooden Mallet

## What it is used for

Use a mallet to apply controlled impact when fitting, shaping, or adjusting parts that may be damaged by a metal hammer.

## How to use

1. Choose a wooden, plastic, or PVC mallet suitable for the task and material.
2. Inspect the head and handle for cracks, looseness, or heavy wear.
3. Secure the workpiece on a stable surface before striking.
4. Wear eye protection and hold the mallet firmly by the handle end.
5. Strike the target with controlled force and keep the mallet face aligned.
6. Check the workpiece and mallet between repeated strikes.
7. Clean the mallet and store it safely after use.

## ⚠ Safety

- Keep fingers clear of the striking area and pinch points.
- Do not use a cracked head, loose handle, or unsuitable mallet.
- Avoid striking hardened metal or other surfaces unless the mallet is designed for it.
- Keep bystanders clear of the work area.

## Care & storage

- Remove dirt and residue from the head and handle.
- Store in a dry place away from heat and moisture.
