External Storage Device

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 9 labs

Covers these lab items: External Hard Drive; External Storage Devices; External Storage Devices (External Hard Drives, USB Flash Drives); USB / Pen drive; USB Drives

What it is used for

Use an external storage device to save, transfer, or back up digital files between compatible computers and devices.

How to use

1. Inspect the storage device and connector for damage before use.
2. Connect it to a compatible USB port or interface.
3. Wait for the computer to recognize the device and confirm the correct drive name.
4. Copy or move the required files and verify that the transfer is complete.
5. Use the operating system's safe-eject option before disconnecting the device.
6. Store the device securely after removal.

⚠ Safety

- Scan unfamiliar storage devices for malware before opening files.
- Do not disconnect the device while files are being transferred.
- Avoid storing confidential data on unapproved or unencrypted devices.
- Keep the device away from moisture, extreme heat, and strong impacts.

Care & storage

- Keep the connector clean and protect the device from dust.
- Maintain a separate backup of important files and store the device safely.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
