Line Rope

Category: **Measuring & Marking Tools** Type: **Short SOP** Priority: **Medium** 9 labs

Covers these lab items: Line and pins; Line dori; Line Rope

What it is used for

Use a line rope to establish straight reference lines for marking, alignment, layout, or measurement tasks.

How to use

1. Inspect the rope and pins for fraying, knots, bends, or damage.
2. Identify the start and end points for the required line.
3. Secure the pins firmly at the marked points where suitable.
4. Tie the rope tightly between the points and keep it clear of obstacles.
5. Check the line alignment and mark along the rope as required.
6. Remove the rope and pins carefully after marking.
7. Clean and coil the rope for storage.

⚠ Safety

- Keep the rope clear of walkways to prevent trips.
- Do not pull the rope across people or fragile objects.
- Use stable pins and avoid placing them where they can injure someone.
- Wear gloves if the rope or pins have sharp or rough parts.

Care & storage

- Remove dirt and allow the rope to dry before storage.
- Coil it neatly and store it away from sharp edges and moisture.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
