Refrigerator

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **Medium** 9 labs

Covers these lab items: Display Cabinet/Showcase; Refrigerator; Refrigerator and freezer; Refrigerator (Double Door); Refrigerator two door

What it is used for

Use a refrigerator to keep food and other approved items at a controlled low temperature for safe storage and display.

How to use

1. Place the refrigerator on a stable, level surface with adequate ventilation.
2. Check the power cord, plug, door seals, and interior for visible damage.
3. Set the temperature according to the manufacturer's guidance and stored items.
4. Allow the unit to reach the required temperature before loading perishable food.
5. Store food in clean, covered containers and avoid blocking air vents.
6. Check and record the temperature regularly, especially for perishable items.
7. Close the door promptly and report unusual noise, leaks, or temperature changes.

⚠ Safety

- Connect the refrigerator to a properly grounded outlet with the correct electrical rating.
- Keep hands dry when handling the plug and avoid damaged cords.
- Do not block ventilation openings or use sharp tools to remove ice.
- Follow food safety temperature guidance and discard food held at unsafe temperatures.

Care & storage

- Clean shelves, door seals, and the interior regularly using suitable cleaners.
- Defrost and service the unit according to the manufacturer's instructions.
