CPR Manikin

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 8 labs

Covers these lab items: CPR Manikin; CPR Manikins and Choking Response Trainers; CPR Mannequin; Manikin; Mannequin (Adult); Simulation Equipment - Mannequins; Simulation tools for CPR and minor injury handling; Training mannequins or simulation tools for CPR demonstrations

What it is used for

Use a CPR manikin to practise chest compressions, rescue-breathing techniques, and basic life-support skills in a controlled training setting.

How to use

1. Place the manikin on a stable, flat training surface.
2. Inspect the manikin, airway parts, and feedback system for damage or missing components.
3. Explain the practice procedure and demonstrate the correct hand position.
4. Practise chest compressions at the recommended rate and depth for the manikin type.
5. Practise rescue breaths only with the approved airway or face-shield arrangement.
6. Follow the trainer's instructions when using feedback indicators or choking-response features.
7. Clean and reset the manikin after the session.

⚠ Safety

- Use a manikin for training, not on a real person in an emergency.
- Use individual face shields or approved airway barriers for each learner.
- Clean contact surfaces between users according to the manufacturer's instructions.
- Stop practice if a component becomes loose, damaged, or unsafe.

Care & storage

- Clean and disinfect reusable parts with approved products after training.
- Store the manikin and accessories in a clean, dry case.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
