Clamp

Category: **Hand Tools - Fastening & Gripping** Type: **Short SOP** Priority: **Medium** 8 labs

Covers these lab items: C-Clamps (for carpentry use); Clamp; Clamp (C-Clamp); Clamps and Hangers

What it is used for

Use a clamp to hold workpieces securely in position during cutting, drilling, gluing, assembly, or other workshop tasks.

How to use

1. Choose a clamp type and size suitable for the workpiece and task.
2. Inspect the frame, screw, pads, and handle for damage or wear.
3. Position the clamp so its pads contact the workpiece securely.
4. Tighten the screw gradually until the workpiece is held firmly without damage.
5. Check that the workpiece cannot shift before starting the task.
6. Release the clamp carefully when the work is complete.
7. Clean and store the clamp after use.

⚠ Safety

- Keep fingers clear of the clamp jaws and pinch points.
- Do not overtighten and crush or deform the workpiece.
- Do not use a cracked or damaged clamp.
- Secure heavy or awkward workpieces with enough suitable clamps.

Care & storage

- Remove dust, glue, and residue after use.
- Store clamps dry with screws loosened slightly when appropriate.
