Hand Trowel

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 8 labs

Covers these lab items: Hand Trowel; Transplanting trowel; Trowel (Khurpi)

What it is used for

Use a hand trowel to dig small planting holes, transplant seedlings, loosen soil, or move compost in garden work.

How to use

1. Choose a trowel with a blade size suitable for the task.
2. Inspect the blade and handle for cracks, rust, or looseness.
3. Wear suitable gloves and footwear before working in the soil.
4. Use the blade to loosen soil or make a small planting hole.
5. Lift soil carefully and avoid damaging nearby roots.
6. Place the seedling or soil as required and firm the soil gently.
7. Clean the trowel after use and store it safely.

⚠ Safety

- Keep fingers clear of the blade while digging.
- Check the work area for sharp objects or buried hazards.
- Do not use a damaged trowel or leave it hidden in the soil.
- Wear gloves when handling compost or soil that may contain irritants.

Care & storage

- Remove soil and dry the blade after use.
- Store the trowel in a dry place with its sharp edge protected.
