Moisture Meter

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 8 labs

Covers these lab items: Digital moisture meter; Digital moisture meter calibrated for all the commodities to be stored/ handled; Moisture meter; Seed moisture tester

What it is used for

Use a moisture meter to measure moisture content in soil, seeds, grain, or other materials supported by the instrument.

How to use

1. Select the correct meter and mode for the material being tested.
2. Check the probe, sensor, display, and battery condition before use.
3. Confirm calibration or perform the recommended check according to the manual.
4. Collect a representative sample or prepare the material as instructed.
5. Insert the probe or place the sample in the meter correctly.
6. Wait for the reading to stabilize and record the value with the material and units.
7. Clean the sensor and return the meter to storage after testing.

⚠ Safety

- Use the meter only for materials and conditions it is designed for.
- Handle probes carefully and avoid contact with sharp or contaminated samples.
- Keep electronic parts dry unless the meter is rated for wet use.
- Follow the manual for calibration, cleaning, and safe sample handling.

Care & storage

- Clean and dry probes or sample holders after use.
- Store the meter in its case and replace batteries as recommended.
