POS Terminal

Category: **Retail, Logistics & Warehouse** Type: **Short SOP** Priority: **Medium** 8 labs

Covers these lab items: Card Swiping Machine; Credit/Debit Card Machine (EDC Machine); Point of Sale (POS) Systems; Point of Sale (POS) Terminal/System; POS/ Computer; POS terminals for billing and payment processing

What it is used for

Use a POS terminal to process authorized sales transactions and record payments through the approved payment or retail system.

How to use

1. Inspect the terminal, display, card reader, cables, and power supply for damage.
2. Power on the terminal and connect it to the approved network or POS system.
3. Sign in using authorized credentials and confirm the correct merchant or store profile.
4. Enter the transaction amount and verify it with the customer before payment.
5. Follow the terminal prompts for card, contactless, or other supported payment methods.
6. Wait for the approval or decline result and provide the receipt as required.
7. Close or log out of the session according to store procedure.

⚠ Safety

- Never ask customers to disclose their PIN or password.
- Do not record or store full card details outside approved systems.
- Use only authorized software and protect terminal access credentials.
- Report suspected tampering, unusual prompts, or payment discrepancies immediately.

Care & storage

- Clean the terminal with approved materials and keep liquids away from openings.
- Charge or power the device as instructed and keep it in a secure location.
