Pruning Knife

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 8 labs

Covers these lab items: Pruning knife

What it is used for

Use a pruning knife to make controlled cuts when trimming small branches, stems, or plant material suitable for hand pruning.

How to use

1. Select a sharp pruning knife suitable for the plant and cut size.
2. Inspect the blade, handle, and folding lock or sheath for damage.
3. Secure the plant material and plan the cut before starting.
4. Cut away from your body and keep the supporting hand clear of the blade path.
5. Make a clean cut without twisting or forcing the blade.
6. Close or sheath the knife immediately after use.
7. Clean and disinfect the blade when needed to reduce disease spread between plants.

⚠ Safety

- Wear suitable gloves and keep the blade pointed away from the body.
- Do not use a loose, damaged, or blunt knife.
- Keep the knife closed or covered when not in use.
- Follow safe handling instructions for disinfectants and cutting tools.

Care & storage

- Clean and dry the blade after use to prevent rust.
- Store it closed or in a protective sheath away from children.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
