# Shampoo Unit

Category: **Beauty, Wellness & Fitness** Type: **Short SOP** Priority: **Medium** 8 labs

**Covers these lab items:** Shampoo Bowl Set; Shampoo Unit

## What it is used for

Use a shampoo unit to wash a client's hair while supporting the head and controlling water flow and temperature.

## How to use

1. Clean and disinfect the basin, neck rest, spray hose, and nearby surfaces.
2. Check the water supply, drainage, chair stability, and hose connections.
3. Adjust the chair and neck support to suit the client comfortably.
4. Test water temperature on your wrist or with an approved thermometer before wetting the hair.
5. Wet the hair gently and apply shampoo according to the service procedure.
6. Rinse thoroughly while preventing water from entering the client's eyes or ears.
7. Dry splashes, clean the basin, and reset the unit after the service.

## ⚠ Safety

- Confirm water temperature with the client and avoid excessively hot water.
- Support the client's neck and avoid forcing the head into an uncomfortable position.
- Keep electrical equipment and plugs away from water.
- Disinfect contact surfaces and follow hygiene procedures between clients.

## Care & storage

- Clean the basin and spray attachments after each client.
- Check drainage and hoses regularly for leaks or blockages.
