Barcode Scanner

Category: **Retail, Logistics & Warehouse** Type: **Short SOP** Priority: **Medium** 7 labs

Covers these lab items: Barcode Scanner; Barcode scanners; Barcode scanners and card readers for guest identification and room keys; Handheld Inventory Scanner (RFID/Barcode); IT Systems

What it is used for

Use a barcode scanner to read product, inventory, or identification codes and transfer the data to an approved system.

How to use

1. Inspect the scanner, cable, battery, and scanning window for damage.
2. Connect or pair the scanner with the approved computer or POS system.
3. Open the correct inventory or identification application.
4. Aim the scanner at the barcode from a suitable distance and angle.
5. Trigger the scan and confirm that the correct code appears on screen.
6. Repeat the scan if the code is not read correctly.
7. Return the scanner to its dock or charging station after use.

⚠ Safety

- Do not stare into a laser scanner beam or point it at anyone's eyes.
- Use only approved chargers and cables.
- Do not scan or access personal information without authorization.
- Keep the scanning window clean and avoid using a damaged device.

Care & storage

- Wipe the scanning window with a soft, suitable cloth.
- Charge and store the scanner according to the manufacturer's instructions.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
