Category: **Hand Tools - Fastening & Gripping** Type: **Short SOP** Priority: **Medium** 7 labs

Covers these lab items: Bench vice; Bench Vice (Code-U - 301); Machine vice

What it is used for

Use a bench vice to hold a workpiece firmly during filing, cutting, drilling, or other workshop operations.

How to use

1. Inspect the vice body, jaws, screw, handle, and mounting bolts for damage.
2. Confirm the vice is securely fixed to a stable workbench.
3. Open the jaws and position the workpiece between them.
4. Place soft jaw covers when needed to protect finished surfaces.
5. Tighten the handle until the workpiece is secure without excessive force.
6. Check that the workpiece cannot move before starting the operation.
7. Loosen the vice carefully and remove the workpiece after the task.

⚠ Safety

- Keep fingers clear of the jaws and screw mechanism.
- Do not use the vice handle as a hammer or add an extension pipe.
- Avoid overtightening, which may damage the workpiece or vice.
- Do not use a loose, cracked, or poorly mounted vice.

Care & storage

- Remove metal chips and dirt from the jaws and screw.
- Keep the screw lightly lubricated and inspect mounting bolts regularly.
