Crowbar

Category: **Hand Tools - Striking & Digging** Type: **Short SOP** Priority: **Medium** 7 labs

Covers these lab items: Crow-Bar

What it is used for

Use a crowbar to pry apart, lift, or loosen suitable materials during controlled dismantling or maintenance work.

How to use

1. Inspect the bar for cracks, bends, sharp damage, or heavy corrosion.
2. Choose a bar length and tip shape suitable for the task.
3. Secure the workpiece and identify a stable fulcrum point.
4. Position the tip carefully in the gap or under the material.
5. Apply gradual leverage while keeping your body out of the likely slip path.
6. Reposition the bar as needed instead of forcing it excessively.
7. Clean the bar and store it safely after use.

⚠ Safety

- Wear safety glasses, gloves, and sturdy footwear.
- Keep hands and feet away from pinch points and the moving load.
- Do not use a damaged bar or an unstable fulcrum.
- Ensure no one is in the path of material that may shift or fall.

Care & storage

- Remove dirt and moisture after use to reduce corrosion.
- Store the crowbar securely with its tip away from walkways.
